

Psychology 221: Sensation and Perception
Fall, 2007

Instructor: Karen Dobkins, Ph.D.
5117 McGill Hall
Phone: 858-534-5434
email: kdobkins@ucsd.edu

- 1) Williams, 1985
“Aliasing in human foveal vision”
Vision Research, 25(2): 195-205.
- 2) Fregnac, Shulz, Thorpe & Bienenstock, 1988
“A cellular analogue of visual cortical plasticity”
Nature, 333:367-370
- 3) Ferster, Chung & Wheat, 1996
“Orientation selectivity of thalamic input to simple cells of cat visual cortex”
Nature, 380:249-252
- 4) Peterzell, Werner & Kaplan, 1995
“Individual differences in contrast sensitivity functions: longitudinal study of 4-, 6- and 8-month-old human infants”
Vision Research, 35(7):961-979
- 5) Neri (2005)
“A Steroscopic look at visual cortex”
J Neurophysiology, 93: 1823-1826
- 6) Nathans, February 1989
“The genes for color vision”
Scientific American: pages 42-49
- 7) Winderickx, Lindsey, Sanocki, Teller, Motulsky & Deeb, 1992
“Polymorphism in red photopigment underlies variation in colour matching”
Nature, 356:431-433
- 8) Albright, 1993
“Cortical processing of visual motion”
In: *Visual Motion and its Role in the Stabilization of Gaze* (Eds., Miles, FA & Wallman, J)
Elsevier Science Publishers, p 177-201

- 9) Lu & Sperling, 1995
“Attention-generated apparent motion”
Nature, 377: 237-239
- 10) Newsome, Britten & Movshon, 1989
“Neural correlates of a perceptual decision”
Nature, 341: 52-54
- 11) Livingstone & Hubel, 1988
“Segregation of form, color, movement, and depth: Anatomy, physiology and perception”
Science, 240:740-749
- 12) Merigan & Maunsell, 1993
“How parallel are the primate visual pathways?”
Annual Review of Neuroscience, 16:369-402
- 13) Dobkins, 2005. “Enhanced Red/Green Color Input to Motion Processing in Infancy: Evidence for Increasing Dissociation of Color and Motion Information during Development. Book Chapter in Yuko Munakata and Mark Johnson (eds) *Attention and Performance XXI*. Oxford University Press. Oxford University Press, pp. 401-423.
- 14) Konishi, Takahashi, Wagner, Sullivan & Carr, 1988
“Neurophysiological and anatomical substrates of sound localization in the owl”
In: *Auditory Function* (Eds., Edelman, Gall & Cowan), Wiley & Sons, Inc., p 721-745
- 15) Knudsen, Esterly & Knudsen, 1984
“Monaural occlusion alters sound localization during a sensitive period in the barn owl”
Journal of Neuroscience, 4:1001-1011
- 16) Knudsen, 1983
“Early auditory experience aligns the auditory map of space in the optic tectum of the barn owl”
Science, 222:939-942
- 17) Knudsen & Brainard, 1995
“Creating a unified representation of visual and auditory space in the brain”
Annual Review of Neuroscience, 18:19-43
- 18) Knudsen & Knudsen, 1989
“Visuomotor adaptation to displacing prisms by adult and baby barn owls”
Journal of Neuroscience, 9:3297-3305
- 19) Knudsen & Brainard, 1991
“Visual instruction of the neural map of auditory space in the developing optic tectum”
Science, 253:85-87
